- Be sure to read and understand all instruction sheets completely before beginning assembly or installation.
- Be sure the power is turned off by removing the fuse or closing the circuit breaker.
- All assembly and installation work must be in accordance with National, State and Local electrical codes. We strongly advise using a licensed electrician.
- Be aware that the weight of some fixtures may exceed the strength rating of the 4" electrical junction box or other such hardware at your site. In all cases, it is the responsibility of the contractor to properly secure the fixture to the structure, and to provide adequate support for the fixture.
- Due to constant production improvements, details of the design, material or finish may change in any way that will not significantly alter installed appearance or reduce function or performance.
