

- Be sure to read and understand all instruction sheets completely before beginning assembly or installation. All assembly and installation work must be performed by qualified personnel, in accordance with all applicable national and local building and electrical codes.
- Be aware that the weight of some fixtures may exceed the strength rating of the 4" electrical junction box or other such hardware at your site. In all cases, it is the responsibility of the contractor to properly secure the fixture to the structure, and to provide adequate support for the fixture.
  - Due to constant production improvements, details of the design, material or finish may change in any way that will not significantly alter installed appearance or reduce function or performance.

Installation instructions for ceiling and wall mount fixtures.

- 1) Turn off power. Feed wire out of the junction box through the mounting bracket.
- 2) Screw mounting bracket to junction box and also to structure with holes provided on outside of mounting bracket. Make sure mounting bracket is level.
- 3) Connect wires from junction box to light fixture. Black to black-white to white, and attach the green ground wire to the green grounding screw. Use wire nuts on the connections and leave no bare wire exposed(excepting the green).
- 4) Slide light fixture onto light fixture mounting bracket and secure with 4 screws provided.
- 5) Screw in lamps and turn on the power and your installation is complete.
