WARNING: DISCONNECT POWER AT THE MAIN FUSE BOX BEFORE INSTALLATION.

WARNING:

This fixture is intended for installation in accordance with the National Electrical Code (NEC) and all local code specifications. If you are not familiar with code requirements, installation by a certified electrician is recommended.

Before assembly, remove all parts and part packages from box. If anything is missing, please contact the retailer from which the product was purchased.

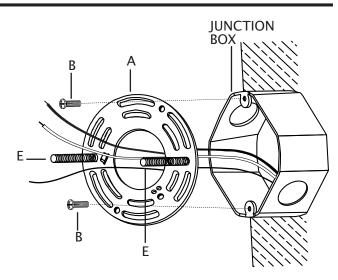

- 1. Position mounting bracket (A) so threaded ends of attached fixture mounting screws (E) are pointing out.
- 2. Carefully pull house wires through center hole in mounting bracket (A).
- 3. Align holes in mounting bracket (A) with holes in junction box. Make sure fixture mounting screws (E) are level.
- 4. Thread each junction box screw (B) into holes in mounting bracket (A) and into holes in junction box. Tighten junction box screws (B) to secure mounting bracket (A) to junction box.

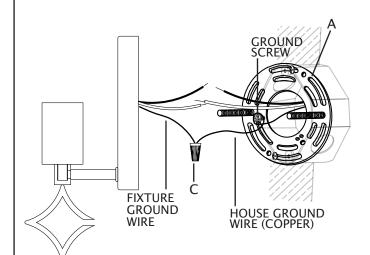

CAUTION: Make sure house wires are pulled completely through hole in mounting bracket. **DO NOT** pinch wires between mounting bracket and wall.

- 5. Strip 3/4" of insulation from ends of fixture wires.
- 6. Slightly loosen ground screw on mounting bracket (A). Do not completely remove ground screw. Wrap house ground wire (copper) around ground screw, leaving enough ground wire to attach to fixture ground wire (bare copper). Twist end of fixture ground wire (bare copper) and end of house ground wire (copper) together. Twist wire nut (C) onto ends of wires. Completely tighten wire nut (C).
